What are "Net Acres"?

Also referred to as "productive acres", the net acres of a sale are the gross acres minus the non-productive acres, which may include road right-of-ways, large landings, brush patches, and rock outcrops.

What are the species codes in the inventory report?

GF = Grand Fir
WH = Western Hemlock
DF = Douglas-fir
WL = Western Larch
WRC = Western Red Cedar
PP = Ponderosa Pine
WP = White Pine
LP = Lodgepole Pine
ES = Engelmann Spruce
SF = Subalpine Fir

What is a Google Earth Placemark?

The KML file is a spatial bookmark that will place a marker in the center of the timber sale and "fly" you to it, providing you have Google Earth installed. Sale boundaries will not be displayed. Please refer to the downloadable maps on this web site for sale boundaries. Potlatch does not offer support for the installation or use of Google Earth. Visit http://earth.google.com for more details.
